DEFINITIONS

Asbestos: Asbestos is present in many forms in the roofing industry. It is commonly referred to as ACRM or "asbestos containing roofing material" which is defined as material containing 1% or more of asbestos. It can be present in cements, coatings, sealants, mastics, flashing material, felts, shingles and tiles. Based on the variety of materials containing asbestos in the roofing industry, we view the asbestos exposure as inherent to roofing operations.

Asbestos Abatement: Roofing contractors who come in contact with asbestos while performing the normal activities of their trade, whether it is roof tear-off work, renovations, new installations or maintenance work, and operating exclusively on the outside of buildings, are eligible for this program. Once an activity requires work on the inside of a building, below the roof deck, the removal of any ACRM becomes true "abatement" work and is not eligible for this program.

CERTA: NRCA Certified Roofing Torch Applicator Program that teaches industry best practices for use of torches in roofing operations.

Construction Manager: entity that administers the construction contract throughout the planning, design and construction phases of the project but does no actual design or construction (pure agency construction manager), or who provides construction advice and construction leadership on a project during the planning and design stages and also provides construction leadership, contract management, direction, supervision, coordination and control of the work during the construction phase (at risk construction manager).

Exterior Finish Systems: Multi-layered exterior wall systems including EIFS, which resemble stucco in appearance, that are used on both commercial buildings and residential homes.

General Contractor: A contractor who subcontracts work to others in excess of 50% of total receipts, exercises primary control of the job site, and is named in the construction documents as the general contractor of record.

Mixed-Use Building: Buildings which include both commercial occupancy and residential/habitational occupancy, and which 30% or more of the building's square footage is being used for, or is intended to be used for human residency.

Prime Contractor: The principal contractor on a project; any contractor on a project having a contract directly with the owner.

Residential/Habitational: Any structure where 30% or more of the square foot area is used or is intended to be used for human residency including but not limited to: single or multi-family housing, apartments, condominiums, townhouses, cooperatives or planned unit developments, and also includes their common areas and/or appurtenant structures (including pools, hot tubs, detached garages, guest houses or any similar structures). When there is no individual ownership of units, residential structure does not include military housing, college/university housing or dormitories, long term care facilities, hotels, or motels. Residential structure also does not include hospitals or prisons.

Residential/Habitational Service or Maintenance Work: repairs, re-covers, tear off and roof deck replacement as long as work performed does not raise a roof, change a roof's pitch, replace structural roof supports, or is part of a total gutting or build-out of a residential structure.

Subsidence: Any movement of land or earth including: landslides; mudflow; earth sinking, rising, and shifting; collapse or movement of fill, earth settling, slipping, falling away, caving in, eroding or tilting; and earthquake.

Torch Applied Roofing: This process involves a modified bitumen installed on a roofing deck by means of a torch. A membrane is laid on the roof, heated by a torch, and allowed to cool so that the material solidifies in place. The asphalt component in the membrane serves as an adhesive between the surface material and roof substrate.

Wrap-up OCIP/CCIP: A policy providing coverage for all interests in a major construction project. An OCIP is an Owner Controlled Insurance Program; a CCIP is a Contractor Controlled Insurance Program.
